ABOUT ME

Specialist AI Engineer and Full-Stack Developer with expertise in Computer Vision, NLP, and Flutter, focused on integrating complex AI models into responsive applications. Currently delivering digital government at Injaz-Tech while completing an Informatics Technology Engineering degree.

PROFESSIONAL EXPERIENCE

Injaz-Tech | December 2023- Current

Software Developer

- Evisa Project (GetX)
- Worked on the Evisa mobile application (ongoing), using GetX for state management, navigation, and dependency injection.
- Developed and maintained core features, implemented reactive UI components, and integrated REST APIs, building ai bots
- **Skills:** Flutter, python, LangChain, django

Focus Digital Solutions | November 2024 - March 2025

UI / UX Designer- part time

- Designed and implemented cross-platform Flutter applications with a strong emphasis on user experience and usability.
- Translated UI/UX designs into high-quality, responsive Flutter interfaces.
- Collaborated with developers and stakeholders to align product design with technical constraints and business goals.
- **Skills:** Figma

INTERNSHIPS

Nexwift | March 2025- june 2025

AI Engineer Intern

- Worked on production-grade AI systems across a 4-month engagement, specializing in prompt engineering, LLM output optimization, and integrating AI features into NestJS-based web services, including deployment and testing of AI endpoints.
- **Skills:** LLMs, Prompt Engineering, LangChain, NestJS, JavaScript, API Integration, Model Evaluation

Misraj Ai | October 2025- December 2025

AI Engineer Intern

- Completed an AI internship handling large-scale dataset collection, cleaning, labeling, and preprocessing to optimize LLM training quality and efficiency.
- **Skills:** python

Injaz-Tech | October 2023- December 2023

Software developer internt

EDUCATION

Damascus University | 2020 – 2026

InformaticsTechnology Engineering

- Specialist in Artificial Intelligence

PROJECTS

E-visa | injaz tech

Technology: Flutter

- A fully digital visa application solution, providing seamless online submission and processing for foreign entrants.

Hader | injaz tech

Technology: Flutter

- Government Services App – Streamlines the submission of official transactions, cutting down processing times while improving access for citizens.

AI Voice Assistant

Technology: NestJS, LangChain, ChatGPT as LLM

- Developed a real-time AI voice assistant that handles voice calls using NestJS as the backend framework.

Newborn Health Monitoring System — Graduation Project

Technology: FlutterAI, Computer Vision (YOLOv8), Fuzzy Logic, Django, Flutter, Firebase

- Developed an integrated AI-powered neonatal health monitoring system for real-time medical data analysis and early risk detection in premature infants.

SKILLS

Programming Languages: Python, JavaScript, Dart, Java

Frameworks & Tools: Flutter, Django, NestJS, Java spring boot , GetX, Firebase, Tensorflow, OpenCV

Other Skills: UI/UX Design, Full-Stack Integration, Prompt Engineering, gRPC, GraphQL, Rest api, MVC

CERTIFICATES

Meta Back-End Developer Professional Certificate 2025

Generative AI with Large Language Models Course 2025

Specialization in Deep learning From Stanford.Ai | 2024

Specialization in Natural Language Processing From Stanford.Ai | 2024

Specialization in TensorFlow: Advanced Techniques From Stanford.Ai | 2024

Flutter Development From Udemy | 2022
